

**TO BEGIN THE TEST:**

1. Read and follow the enclosed instructions.
2. Using the placement guide, find a suitable location for the chamber.
3. Unscrew the cap at the top of the E-perm chamber. A spring inside the cap will lift the cap, thus exposing the electret mechanism inside. **NOTE**, under no circumstances should the large disk at the bottom be unscrewed.
4. **IMPORTANT**. Fill out the start date and time on this form.

**TO END THE TEST:**

1. Push the cap back down and screw it until it bottoms (finger tight will do).
2. **IMPORTANT**: Fill out the stop date and time on this form. Place the chamber and form in the box.
3. Have the chamber/box returned to JMS Environmental Services Inc. for analysis.
